

Course Name	Essentials of Deep Learning		
Course Code	23CSE116	Presentation Deadline	25/10/2025

ASSIGNMENT

QUESTION: Design and develop a website that enables users to upload any two images and compute their similarity using suitable image processing or deep learning techniques. The system should display a similarity score or percentage and provide a clear visualization or explanation of the results to help users understand how similar the two images are.

Instructions to Students:

- Students who have already formed project groups may take up this assignment.
- Each group should design, implement, and demonstrate the working of the website.
- A short presentation explaining the approach, tools used, and results obtained must be prepared.
- The presentation and demonstration should be completed on or before the assigned deadline.
